

Sample Microsoft 365 Assessment

This sanitized report illustrates the structure of TenantIQ output using real assessment patterns and sample values from the current product build.

Workload	Checks	Pass	Warn	Fail	Score
Entra Identity Security	53	39	0	14	73.6%
OneDrive	50	23	8	0	46%

Entra Identity Security - Sample Findings

Status	Check	Evidence
FAIL	Named location(s) exist	0 named locations
PASS	Privileged roles assigned via groups	No groups have privileged role assignments
PASS	Security Defaults disabled	Security Defaults disabled
FAIL	Admin portal restricted	No policy blocks admin portals for non-admins
PASS	Authentication Methods: FIDO2 enabled	FIDO2 enabled
FAIL	Authentication Methods: TAP enabled	TAP disabled

OneDrive - Executive Summary

Sanitized workload excerpt from a TenantIQ OneDrive assessment.

Overall health: 46% Checks completed: 50 Passed: 23 Warnings: 8 Failed: 0
Highest priority finding: Legacy Authentication - Legacy authentication protocols are enabled for SharePoint/OneDrive.
Recommended next action: Disable legacy authentication unless a documented exception requires it.

Sample OneDrive Findings

Status	Check	Category	Finding	Recommendation
PASS	Device Compliance Alignment	Access Control	1 Intune managed device was reviewed and none were returned as noncompliant/in grace period.	Continue compliance monitoring and Conditional Access enforcement.
PASS	MFA Access Alignment	Access Control	1 enabled Conditional Access policy requires MFA or authentication strength.	Validate user/application scope to ensure OneDrive/SharePoint access is covered.
WARN	Legacy Authentication	Security	Legacy authentication protocols are enabled for SharePoint/OneDrive.	Disable legacy authentication unless a documented exception requires it.
WARN	Download Restrictions	Access Control	Unmanaged devices receive full SharePoint/OneDrive access.	Consider limited web-only access or blocking unmanaged-device access for sensitive data.
PASS	DLP Coverage	Compliance	3 Purview DLP policies were detected.	Review policy locations and confirm SharePoint/OneDrive are included where required.

This public sample is sanitized and abbreviated. Production assessments may include additional evidence and workload-specific context.
